

Server Recommendations for Koha

	Small Library System	Large Library System (500,000+ circs/year)	
Server(s)	Single Server	Main Server	DB Server
OS	Debian	Debian	Debian
RAM	2GB	16GB	4-8GB
CPU	dual or quad core 2GHz	quad core 2GHz	quad core 2GB
Hard Drive	300GB+	500GB+	500+GB
NIC	100MB+	1GB+	1GB+
Updates	Git	Git	
Backup	External HD or Tape	External HD or Tape	
Software	memcached, mod_perl	memcached, mod_perl	MySQL

Notes:

1. Debian Linux (most if not all developers – complete development on a Debian Server and have that flavour of linux in mind when they code) – install and use the most recent stable version <http://www.debian.org>
2. Git is used to update the Koha source code
